

<<Scissors Congruences>>

图书基本信息

书名：<<Scissors Congruences, Group Homology and Characteristic Classes (平装)>>

13位ISBN编号：9789810245085

10位ISBN编号：9810245084

出版时间：2001年04月

出版时间：World Scientific Publishing Company (2001年4月1日)

作者：Johan L. Dupont

页数：168

## <<Scissors Congruences>>

### 内容概要

These lecture notes are based on a series of lectures given at the Narkai Institute of Mathematics in the fall of 1998. They provide an overview of the work of the author and the late Chih-Han Sah on various aspects of Hilbert's Third Problem: Are two Euclidean polyhedra with the same volume "scissors-congruent", i.e. can they be subdivided into finitely many pairwise congruent pieces? The book starts from the classical solution of this problem by M Dehn. But generalization to higher dimensions and other geometries quickly leads to a great variety of mathematical topics, such as homology of groups, algebraic K-theory, characteristic classes for flat bundles, and invariants for hyperbolic manifolds. Some of the material, particularly in the chapters on projective configurations, is published here for the first time.

<<Scissors Congruences>>

书籍目录

Preface  
Chapter 1. Introduction and History  
Chapter 2. Scissors congruence group and homology  
Chapter 3. Homology of flag complexes  
Chapter 4. Translational scissors congruences  
Chapter 5. Euclidean scissors congruences  
Chapter 6. Sydler's theorem and non-commutative differential forms  
Chapter 7. Spherical scissors congruences  
Chapter 8. Hyperbolic scissors congruence  
Chapter 9. Homology of Lie groups made discrete  
Chapter 10. Invariants  
Chapter 11. Simplices in spherical and hyperbolic 3-space  
Chapter 12. Rigidity of Cheeger-Chern-Simons invariants  
Chapter 13. Projective configurations and homology of the projective linear group  
Chapter 14. Homology of indecomposable configurations  
Chapter 15. The case of  $PGI\{3, F\}$   
Appendix A. Spectral sequences and bicomplexes  
Bibliography  
Index
