

<<科学的前沿>>

图书基本信息

书名：<<科学的前沿>>

13位ISBN编号：9789812384140

10位ISBN编号：9812384146

出版时间：2003-11

出版商：World Scientific Pub Co Inc

作者：Hwa-Tung Nieh

页数：549

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## 内容概要

The International Symposium on Frontiers of Science was held to celebrate the 80th birthday of Chen Ning Yang, one of the great physicists of the 20th century and arguably the most-admired living scientist in China today. Many of the world ' s great scientists — including sixteen Nobel laureates, Fields medallists and Wolf Prize winners — converged on Beijing from all corners of the globe to pay tribute to Professor Yang. The Symposium was organized by Tsinghua University, with which Professor Yang has had a lifelong relationship. In 1997, he helped to found the Center for Advanced Study at Tsinghua, was appointed to the university ' s faculty, and has since devoted his energy to the growth of the Center. This unique and invaluable birthday volume is a collection of the presentations made at the Symposium, including fifteen plenary talks, seven of which are by Nobel laureates. It covers a wide range of topics and mirrors Professor Yang ' s research and intellectual interests. The range of fields encompasses high-energy, condensed-matter, mathematical, applied, bio-, astro-, atomic and quantum physics. Also included are talks given at the birthday banquet. --This text refers to an out of print or unavailable edition of this title.

## 书籍目录

Preface  
 PLENARY SESSIONS  
 The Laser -- What It Is and How It Happened Charles H. Townes  
 Neutrino Physics Rudolf L. Moessbauer  
 Gauge Theory at Tsinghua Shiing-Shen Chern  
 Emergent Relativity Robert B. Laughlin  
 Watching Molecular Systems Work, One at a Time Steven Chu  
 Functional Analysis of the Human Genome: Study of Genetic Disease Lap-Chee Tsui  
 Angle-Resolved Photoemission Spectroscopy  
 Studies of Cuprate Superconductors Zhi-Xun Shen  
 Superconductivity in 4-Angstrom Carbon Nanotubes  
 Ping Sheng  
 Understanding High Tc Superconductivity Zheng- Yu Weng  
 The Hidden Information in the Standard Model Gerard 't Hooft  
 Some Reflections on the Mechanization of Mental Labor in the Computer Age Wen- Tsun Wu  
 Research and Development Towards X-Ray Free Electron Lasers Li Hua Yu  
 Imaging the Quantum World Using the Phase of Electron Waves Akira Tonomura  
 Bose-Einstein Condensation in a Dilute Gas; the First 70 Years and Some Recent Experiments Eric A. Cornell and C. E. Wieman  
 Production of a Bose-Einstein Condensate of Metastable Helium Atoms Claude Cohen-Tannoudji et al  
 PARALLEL SESSIONS  
 Particle and Field Theory Broken Unitarity of the SM Bing An Li  
 Spatiotemporal Complexities at the Subnuclear Level of Matter Meng Ta-Chung  
 Polarization Effects in B -- V1 V2 and Subsequent Decays G. Kramer, Hee-Sung Song and Chaehyun Yu  
 Quantum Field Theory Without Regularization and Hard Divergence: Short-Distance Boundary Interactions and Anomalous Contributions in QED Lai-Him Chan  
 QFT, Strings and Low-Dimensional Topology Hu Sen  
 Statistical and Mathematical Physics  
 Inter-disciplinary Topics  
 Biophysics  
 Condensed Matter Physics  
 Astrophysics and Cosmology  
 BANQUET SPEECHES
